

# Persian Astrology & the Jupiter-Saturn Conjunction

By Ehsan Khazeni

**T**he conjunction of Jupiter and Saturn is considered a new beginning which impacts the destiny of a

generation for the following 20 years. The degree of conjunction is significant as well. This degree is very important in Persian astrology.

The conjunction of Saturn and Jupiter is an important ascendant for mundane analysis. This point is relevant to the events of the following 20 years, until the next conjunction. The conjunction point is taken as the ascendant. The chart of the conjunction can be interpreted in different ways. In Persian astrology, we work a lot on this point, as well as the degrees of the previous conjunctions. I will demonstrate a few useful techniques which were developed for the Tropical Zodiac, but as there is no astronomical dependency it can easily be applied to the Sidereal Zodiac.

## Muntha

There are two simple techniques. The first uses *Muntha* or 'Profecion', and the second compares the ascendant, planets, and *dasas* or 'cycles' of political figures' charts, along with the conjunction chart.

Here's how it works: One sign = one year. In Tajik rules, which is a part of Persian astrology adopted and developed in India in the 15th and 16th centuries, it is called *Muntha*. The word *Muntha* comes from the Arabic word "Munteha" which means the 'ending point' or 'reaching point'. There are more advanced versions of this technique, but here I will demonstrate the simplest version.

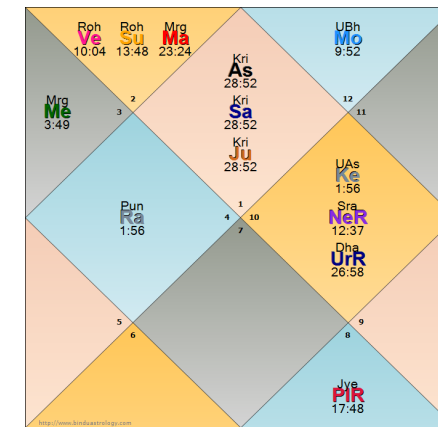

In natal astrology, for the first year of life, *Muntha* is placed in the ascendant or first house. For the second year, *Muntha* moves to the second house, and the planet which rules the sign in which the *Muntha* is placed is the ruler for that year. In the same way, after completing 12 years, the *Muntha* returns to the first house at the age of 13. The same technique is also used by Vedic astrologers.

For the conjunction chart, we can do the same. We can check the signs, planets, transits, etc. To demonstrate this, I will show some events relating to past conjunctions. In Persian astrology, the mundane charts are considered very powerful, and these conjunction degrees play a significant role in placing suitable people in charge in governments. I will show how the mundane chart can be related to the natal chart of important public figures.

***These conjunction degrees play a significant role in placing suitable people in charge***

## Previous Jupiter-Saturn Conjunctions

The previous conjunction of May 28, 2000 was at 28°Aries (Sidereal) in *Krittika Nakshatra* (lunar mansion). Saturn was debilitated and shows violence. Also, Mars as the ruler of Ascendant is in its own Nakshatra. *Krittika* is symbolized by a knife or sword. The bright stars related to this Nakshatra are the Pleiades, which are likened to a flame.

Jupiter- Saturn Conjunction, May 2000

In September 2001, a year after the conjunction, which places the *Muntha* in Taurus, was when the world trade center towers were attacked. Mars is in Taurus, in the second house of the 2000 conjunction chart, placed with the *Muntha* or 'progression sign' of Taurus for 2001. Bin Ladan himself had Mars and Ketu (south node) in *Krittika* in his natal chart, very close to the conjunction point mentioned. He had his Moon in *Krittika* at 28°31' of Aries, exactly at conjunction degree, which was 28°52'! Mars in Taurus was the trigger of all wars that happened later in that decade, and its impact can still be felt by anyone who has Mars and Ketu at this conjunction point.

In 2001, with the *Muntha* in Taurus, its lord was Venus. In that year, George W Bush became the President of the United States. He has Venus (lord of *Muntha* sign for 2001) in his Ascendant, and he was in a Saturn-Rahu (north node) *Dasa* (cycle). Saturn is the ruler of the 10th house in the conjunction chart. He also has Rahu at 27° Taurus. In 2009, the *Muntha* came to Capricorn. Barack Obama has Capricorn ascendant, but he also has Moon in *Rohini* at 10° Taurus, which is at the same degree as Venus in the conjunction chart.

***Mars in Taurus was the trigger of all wars that happened later in that decade***

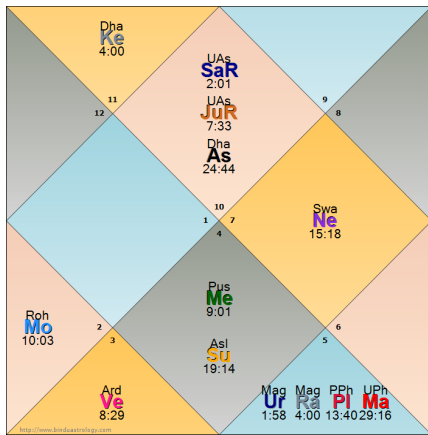

Venus is the planet of popularity and harmony, and *Rohini* is the Nakshatra of respect and courtesy. Interestingly, he has Saturn at 2°01' Capricorn, which is at the same degree as Ketu in the conjunction chart (1°56). His Ascendant is 24° Capricorn, which is where Uranus is placed in the conjunction chart. Uranus is the planet of unexpected events. His natal Moon is at Venus' degree in the conjunction chart, bringing more harmony and balance to the United States.

Next came Donald Trump, with Leo ascendant. In 2016, the *Muntha* was Leo! Trump has a very powerful Leo Ascendant. He also has Rahu at 27° Taurus. George W. Bush also has Rahu at the same degree. Moreover, Rahu in the conjunction chart falls on Trump's natal Saturn. His Uranus is exactly at the Mars degree of the conjunction chart. Trump won his election on the very last days of his Rahu-Mars *Dasa*.

## The Jupiter-Saturn Conjunction of 2020

The upcoming conjunction is in Sidereal Capricorn, with Saturn in its own sign. It seems that the next two decades will be more political rather than violent. Politics plays a significant role in suppressing violence. Using this technique, we can check the charts of nominees of the upcoming presidency of the United States, which is in the first year of this conjunction, so the Muntha is in Capricorn and the 1<sup>st</sup> house.

Barak Obama's North Indian Birth Chart

Will Barack Obama run for the presidency again? The conjunction falls on Obama's natal Jupiter. His retrograde Jupiter is at 7°33' Capricorn, while the conjunction point is at 6°20' Capricorn. At this time, he will be in his Saturn-Ketu Dasa. Even if he doesn't come back for presidency, he will have a big role in the next two decades.

**It seems that the next two decades will be more political rather than violent**

What about Donald Trump, who has Rahu at 27° Taurus, with Rahu of the conjunction chart at 5°44 Taurus? Rahu is even closer to his natal Uranus at 24°48! We can observe how Munthas of the 2020 conjunction chart reveal upcoming events for the next two decades and how politicians and other important people appear and disappear during the related Munthas.
